

# GLOBAL COLOR REPORT

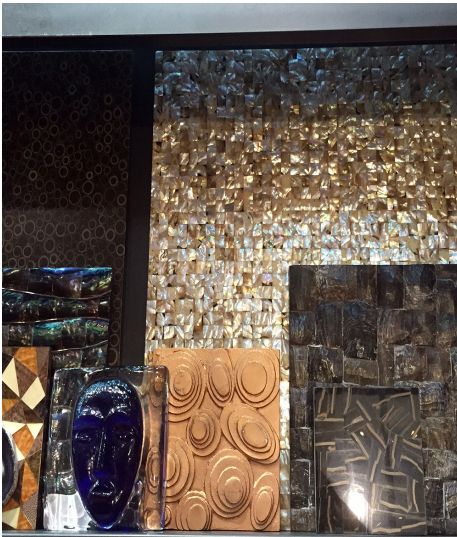

## FALL/WINTER 2015/2016

A publication of Color Communications, Inc.

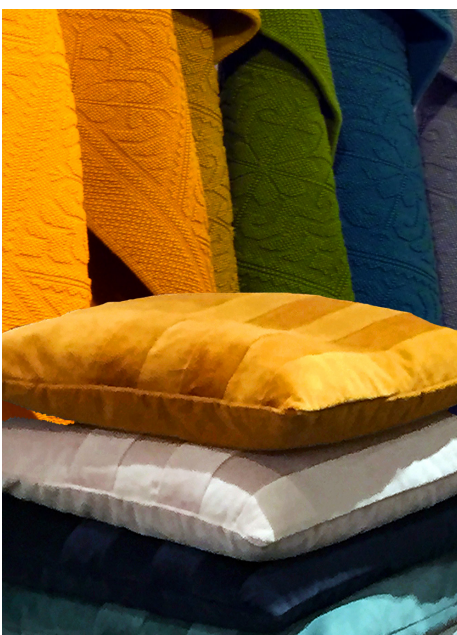

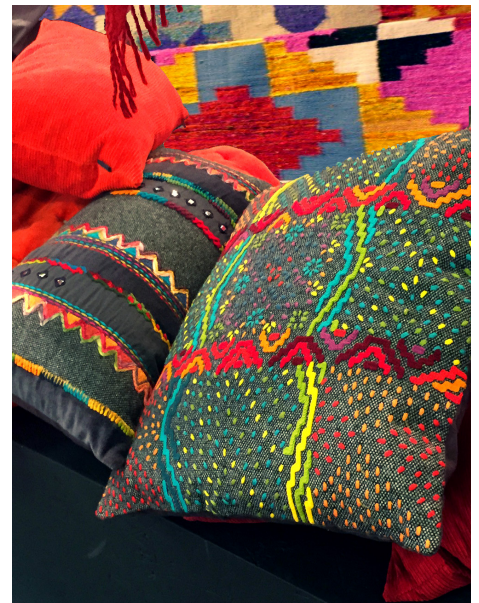

# Innovation *and* Tradition

Innovation and tradition converge to create a hybrid of craft, technology, texture and structure. Textures warm - precious metals prevail. Golden and mixed metal finishes and sculptural light features define a new melding of our "urban nature".

# Eclectic

Color rooted in global cultures that blurs regional boundaries. An appearance of hand-crafted textures defining an expression of new found authenticity... A fusion of vibrant earth tones and bright excitement.

Welcome home to comfort, warm, layered, grayed colors sweetened with happiness. Colors that feel warm, cool, and luxurious all at the same time...  
A fresh feeling of refined ease.

# COZY

# ELEGANT

The re-purposed splendor of golden finishes, sparkling crystal, sculptural lighting, opulent textures, grayed blues and purples, blended with golds and greens. A style of timeless and refined luxury.
